REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The closest prior art of record fails to teach or suggest the recited expanded thermoplastic resin sheet. Independent claim 1 identifies the uniquely distinct features of a thermoplastic expanded resin layer having "an expansion ratio in a range of 3 to 40 times", "a cell wall density ratio in a range of 2 to 20" and "an average cell diameter in the range of 1 μm to 100 μm ". Independent claims 2 and 3 identify the uniquely distinct features of a thermoplastic expanded resin layer having "an expansion ratio in a range of 3 to 40 times", "a cell wall density ratio in a range of 6 to 20" and "an average cell diameter in the range of 1 μm to 100 μm ". Independent claim 4 identifies the uniquely distinct features of a thermoplastic expanded resin layer having "an expansion ratio in a range of 3 to 40 times", "a cell wall density ratio is not less than 2 but less than 6" and "an average cell diameter in the range of 1 μm to 100 μm ". The closest prior art of record, Morita et al. (JP 10-130412), discloses an expanded polypropylene resin sheet, which either singularly or in combination, fail to anticipate or render obvious the above limitations.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Catherine Simone whose telephone number is (571)272-1501. The examiner can normally be reached on 9:30-6:00.
